PROFESSIONAL SUMMARY

- Java Full-stack Software Engineer with 5+ years of experience building enterprise applications in health-care and banking. Currently developing banking solutions for **Lloyds Banking Group** at **TCS** using **Java, Spring Boot**, and microservices. BRAVO Award recipient for operational excellence.

EXPERIENCE

Tata Consultancy Services (Client: Lloyds Banking Group)

Software Engineer

Jun 2026 - Present

Hyderabad, India

- Developing enterprise banking applications using **Java, Spring Boot**, and **REST APIs**.
- Building scalable **microservices** for banking and payment solutions.
- Collaborating with Agile teams on development, testing, and production support.

UnitedHealth Group

Assistant Manager

Apr 2021 - Jun 2026

Feb 2025 - Jun 2026

- Led the modernization of a legacy provider lookup application by migrating from .NET to a **React** frontend with a **Java** backend, improving maintainability and accelerating feature delivery.
- Implemented enterprise **SSO** authentication and secure **REST APIs**, enabling seamless and secure access for internal users.
- Designed performant backend data access using **SQL Server** stored procedures, improving provider search reliability and response consistency.
- Automated operational workflows using **Shell** and **Python**, reducing manual effort by **85%**.

Software Engineer I

Apr 2021 - Jan 2025

EDUCATION

Post Graduation Diploma in Advanced Computing

IACSD, CDAC

Feb 2020 - Feb 2021

Pune, India

Bachelor of Engineering - Computer Engineering

Government College of Engineering and Research

Jun 2015 - Jun 2019

Pune, India

SKILLS

Frontend React | JavaScript/TypeScript | Angular

Backend Java | SpringBoot | Microservices Architecture | Gen AI Integration

Database & DevOps SQL Server | AWS | Kubernetes | Docker | CI/CD

PROJECTS

Enterprise Banking Platform (Lloyds Banking Group)

- Developing Java Spring Boot microservices supporting retail banking workflows.
- Building secure REST APIs and contributing to scalable banking applications.

Provider Lookup Platform (UnitedHealth Group)

- Modernized a legacy provider lookup platform by migrating to a **React** frontend and **Java** backend, improving maintainability and accelerating feature delivery.
- Implemented enterprise **SSO** authentication and secure **REST APIs**, enabling seamless access for internal users.
- Enhanced provider search using AI-assisted keyword matching and resolved critical transaction issues impacting business operations.

AWARDS

- BRAVO Award, UnitedHealth Group** – Optimized high-usage processes to save at least **50%** effort, improving operational efficiency.
